

Are you experiencing challenges while developing your own software :

- ❖ Increase in time to market
- ❖ Software quality is challenging
- ❖ Limited / old Functional Documentation
- ❖ Dependency on / high costs of testers
- ❖ Migrating critical systems to a new environment
- ❖ Controlling / certify your development environment
- ❖ Late surprises during software development

Special
Offer: free
feasibility study

We offer a competitive solution to support you in first time right software development and can deliver continuous control over your software and changes (agile & waterfall).

	Controleer uitkomst	Hand	Automated	Automated

- High Automation
- High Test Coverage
- Independent Testing
- Complex and complete test cases
- Easy maintenance
- Unambiguous specifications

- ✓ Document your functional model
- ✓ Automatic testing
- ✓ Comparing systems after migration providing 100% assurance
- ✓ Certification of compliant environments (such as FDA)
- ✓ 50-75% saving on test resources / capacity
- ✓ Time to market reduced by 50%

>= 50%

Free-up test capacity to focus on other priorities

50-60%

Testing takes up to 50-60% of the total implementation budget
